

Task: Cut the Steak into Thick Slices with a Steak Knife

Fallback Mechanisms and Probabilities:

Fallback Mechanisms:

3. **Planning**: Recalculate slicing path or simplify slicing task if probability is below 0.88.
4. **Execution**: Pause and recalibrate knife alignment if confidence in feedback is below 0.92.
5. **Evaluation**: Retry slicing or provide user feedback if slice quality is inadequate (confidence < 0.9).
